

Module 5 Review

1. Team Focus is a recommended concept not a mandated one.
 - a. True
 - b. False
2. The Pit Crew Approach or Team Based method requires:
 - a. Communication
 - b. Practice
 - c. Role assignments
 - d. All of above
3. The important concepts of the Team Focus Protocol are all of the following except:
 - a. High Quality CPR
 - b. Early defibrillation
 - c. Prevention of hyperventilation/oxygenation
 - d. Interruptions of chest compressions to insert advanced airways
4. The adult CPR protocol:
 - a. Compressions first
 - b. Inquire about DNR or other forms
 - c. Emphasizes early IO
 - d. All of above
5. High Quality CPR involves:
 - a. Compression rate 80, stopping compressions to attach the AED
 - b. Stopping compression to intubate and start the IV
 - c. Limited interruptions < 10 seconds, compression rate at least 100, depth of 2 inches, complete recoil, and switching compressors every 2 minutes
 - d. Moving the patient to the stretcher and heading to the ED
6. Atropine is being used routinely in the Asystole/PEA algorithm.
 - a. True
 - b. False
7. Vtach and Vfib the focus is on High Quality CPR.
 - a. True
 - b. False
8. Hypothermia is an optional protocol.
 - a. True
 - b. False
9. Post Resuscitation care includes:
 - a. Avoiding hyperventilation
 - b. Optimize cardiopulmonary function and vital organ perfusion
 - c. Identify STEMI
 - d. All of the above
10. North Carolina (RACE CARS) is a part of a national project called HeartRescue, sponsored by the Medtronic Foundation, which has the goal of improving survival by 50% over the next five years.
 - a. True
 - b. False

Answers: 1. True, 2. D, 3. D, 4. D, 5. C, 6. False, 7. True, 8. True, 9. D, 10. True
